

FOR IMMEDIATE RELEASE

PATTERSON MEDICAL LAUNCHES NEW PTOS SOFTWARE VERSION 4.5

Patterson Medical has officially launched its new PTOS software Version 4.5, offering a number of valuable enhancements. Benefits to rehabilitation professionals include fully integrated insurance claims and remittance processing, improved patient statements and reporting, as well as innovative advancements for multi-clinic practices.

PTOS Version 4.5 uses the newest Microsoft technologies and integrates seamlessly with PTOS Documentation and Scheduling modules. This updated version has been extensively tested by 70 rehabilitation practices throughout the U.S. with overwhelmingly positive results.

“Physical therapy and other rehabilitation practices can now take advantage of market-leading functionality with Version 4.5,” said Robert Brooker, Patterson Medical director of PTOS software. “This exciting practice solution culminates more than three years of extensive research, input from users and development.”

Version 4.5 enhancements to improve revenue management and labor efficiencies include:

- Improved patient statements** – Easy-to-read, itemized statements; customized print options.
- Improved reports** – Condensed/combined reports offer easier access to your data; sort by columns, save in multiple formats, filter reports and much more.
- eClaims and eRAs** – Claims and remittances delivered electronically through an integrated partner allow for convenient one-source support.
- Tracking by case numbers** – Track by unique case number; create multiple cases for same patient.
- Track unapplied payments** – Designate credit payments for addressing at a later time.
- Reimbursement cap tracking** – Track up to two reimbursement caps simultaneously, with different date ranges.
- Color-coded transactions** – Easily identify transactions by color in the ledger.
- Automatic transaction approval** – Hold transactions for approval prior to billing patients.
- Automatic A/R calculated** – Up-to-date accounts receivable displays on transactions, as well as reports.
- CPT codes** – Add tax information to CPT codes; track using new reporting.
- CCI and LCD datasets** – Warnings for specific code pairings improve billing efficiency.
- CPT code groups** – Codes often used together can be combined into a single code.
- Improved security** – Assign customizable security settings to staff.
- Revenue codes** – Create and customize revenue codes by discipline.
- Claim reconciliation** – View claim status at the claim level.
- Claims queue** – Send claims to a queue for better organization and control.
- Bulk insurance payments** – Post payments to multiple patients at the same time.
- Primary, secondary, tertiary, etc., insurance information** – Add insurance information to cover all types of patient coverage.
- Improved ERA functions** – Quickly, accurately post payments to claims/services associated with EOBs.
- Fee schedules with allowed amounts and effective dates** – Efficiently manage fee schedules.
- Statements queue** – Send statements to a queue for better organization and control.
- Improved multi-facility functions** – Track and filter cases by facility.
- Improved data integrity** – Enforced data entry increases stability of the database.

PTOS software, the industry's most supported software, includes a 90-day money-back guarantee to ensure complete satisfaction. For more information on PTOS software and how this solution can help increase practice productivity and profitability, please visit www.ptos.com or call 800.824.4305.
